Ms. Mento,

According to our Information Services Department (a unit within the police department that handles IT), it was determined the Department spent \$6,228 of the money allocated for RIPA to purchase MDM licenses for mobile devices related to data collection.

This week we are interviewing candidates for one data analyst position, which is a new position to the Department. The position is an Information Systems Analyst III classification. Class specifications and salary range can be found on the City's public website at <https://www.sandiego.gov/empopp>.

It is my understanding this position will have support duties related to RIPA and other assignments/duties as determined by Information Services.

I did not receive a specific invoice yet for the monies spent that I can provide, just information on the expenditure so you had it before your deadline.

I will see if I can get documentation tomorrow morning, but that is the best response I can provide today.

Lt. Jeffrey Jordon

Chief's Office/Special Projects -SDPD
